

# The American Society for Nondestructive Testing Colorado Section

## *April 2017* **MEETING ANNOUNCEMENT**

**Join us at**  
*Elementum 3D facilities*  
**For the Tour & Presentation of the  
State-of-the-art Additive Manufacturing Research Facility**

*Dr. Jeremy J. Iten will be presenting on “Non-Destructive Evaluation Needs for Additive Manufacturing of Metals and Composites.” His presentation will provide brief description on the directed energy powder bed fusion processes to manufacture complex components from a variety of metals based materials and from metal-ceramic composites and functionally graded materials. This will also address the need for novel non-destructive evaluation methods and qualification challenges required to characterize these complex materials.*

**DATE:** *Thursday, April 13, 2017 @ 05:00 PM*

**LOCATION:** *405 Young Ct., Erie, CO 80516*

*(The facility is located in the same building as Azar's Woodshop.)*

***We look forward for your active participation in this exciting event!***

## Parking Map and Information

The facility parking space holds for up to 18 vehicles on-site near the entrance and additional space in a nearby lot. Please refer to the attached a map image of Elementum 3D facilities and on-site and overflow parking.
